Subject: Microsoft Settlement

Enough is enough! Yes Microsoft is a monopoly and yes they were proactive in the growth of their business (like most companies). But if it were not for Microsoft the PC would not be where it is today. If you left it up to Apple or IBM you would be moving a lot slower and at MORE cost! I am also very curious to what the economy and stock market would do if this was settled. I believe that if AOL or Netscape could get where MSFT is today by doing the same things maybe more or less they would! Settle it enough is enough! Thank you.
